Computer and Information Sciences and Engineering

Dear Colleague:

We are announcing a change in the deadline date for proposal submission for the CISE Research Resources Program [NSF01-100]. The new due date for proposals will be March 18, 2002. Letters of Intent may be submitted at any time and are not required. This change addresses the apparent confusion that resulted from the date not having been updated on various NSF web sites from the prior July 2001 date. This change is for 2002 only. In the future, the program deadline will be the first Monday in February as specified in the Program Announcement.

Sincerely,

W. Richards Adrion
Division Director
